Work Experience

Technical Writer — The Digital Dose

Nov 2025 – Dec 2025

- Authored **6 technical articles** on AI, Web3, and emerging tech, accumulating **400+ claps** and **~600 views** in under 8 weeks; top article on Web3 reached **104 claps**.
- Translated complex platforms (Satsuma, Sarvam, GPT-5.1) into accessible explainers; co-authored pieces with cross-functional collaborators across design and engineering.
- Collaborated with designers and social media teams to distribute content across LinkedIn and X; contributed to topic ideation and content strategy for the publication's editorial calendar.

Roles & Responsibilities

Technical Editorial Co-Lead — GDG (Google Developer Group)

Sept 2025 – Present

- Co-led a technical editorial team of **4 junior writers**, overseeing content quality across **5+ published articles** over 8 months.
- Authored content on Cloud Computing (GCP), Agentic RAG, and Open Source — accumulating **400+ presentations** and **180+ views**; top article hit a **40% read-through rate**, outperforming Medium benchmarks.
- Standardized editorial review and publishing workflows, improving consistency across team output.

Projects

AskIT — Multi-Agent RAG Knowledge Base Platform

GitHub

- Built a full-stack RAG platform with a multi-agent pipeline (Planning → Retrieval → Synthesis) using ChromaDB for semantic search and Groq's LLaMA 3 for response generation.
- Implemented role-based access with Supabase Auth and org-scoped retrieval; extending with Google Drive and Slack integrations for direct document ingestion.
- **Tech:** React, FastAPI, Supabase, ChromaDB, Groq API, sentence-transformers

SEHAI — AI-Powered Rural Healthcare Platform

GitHub

- Built an XGBoost classifier predicting 42 diseases from 133 symptoms; fine-tuned ResNet18 CNNs for eye (4 classes) and skin disease (14 classes) classification.
- Developed a 3-tier role-based web app (ANM / PHC / CHC) digitising India's public healthcare referral chain with voice-enabled multilingual symptom capture for low-literacy field workers.
- **Tech:** Python, FastAPI, XGBoost, PyTorch, React (TypeScript), PostgreSQL

SRS Builder

Live — GitHub

- Built and deployed a client-side React tool that converts GitHub README content into IEEE 830-compliant LaTeX SRS documents — fully free, no API calls, no backend.
- Used by classmates for academic PBL submissions; live at **srs-builder.vercel.app**.
- **Tech:** React, TypeScript, Vite, Vercel

Achievements

- **2nd Place** — GDG MUJ Hackathon 2026 Tech Sprint.
- **Top 13** of 60+ teams — GDG x Dell Ideathon 2026.
- **Top 50** of 250+ teams — Vichar Vikaas Ideathon; selected for pre-incubation at Atal Incubation Centre, MUJ.
- **1st Place** — SUI Dev Workshop, securing a \$25 bounty.
- **Top 20 Finalist** — IEEE INDICON Intel Hackathon 2024 (IIT Kharagpur).

Skills

Languages: Java, Python, C, HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, NumPy, Pandas, Scikit-learn, PyTorch

Tools & Technologies: Git, GitHub, VS Code, REST APIs, ViteJS

Domains: Full-Stack Web Development, Frontend Development, Machine Learning, Generative AI, Blockchain (Beginner)

Education

Manipal University Jaipur

Aug 2024 – Present

B.Tech in Computer Science and Engineering

CGPA: 8.63/10

Relevant Coursework: Data Structures and Algorithms, RDBMS, Principles of AI, OOP (Python, Java)
